

## Verbal Feedback A-B Test (in order)

B:

- Usage graph and list very confusing
  - Have to click and hold to see information
  - Are there different graphs? It doesn't make much sense
- State doesn't get saved
  - Accepted a challenge and when navigating back to dashboard it was unchecked again

A:

- Dashboard is a lot more intuitive
  - No popup is better for accepting, less cumbersome
- Bubbles are more intuitive than list but, no indication that you have to click somewhere to get more detail
- Rankings feel more natural to go through
- Much better user experience
